VALUATION STANDARDS

As mentioned earlier, the valuation has been undertaken based on ICAI Valuation Standards issued by The Institute of Chartered Accountants of India.

VALUATION BASES

Valuation base means the indication of the type of value and represents the fundamental premise on which the value will be based. The Standards define the following valuation bases:

- Fair Value
- Participant Specific Value
- Liquidation Value

In the present case, based on our discussions with the Clients and the purpose of the valuation, the present valuation analysis is on a going concern basis and is not specific to any identified participant. Accordingly, we have considered a Fair Value base for the present valuation exercise.

RELATIVE VALUATION APPROACHES AND METHODOLOGIES

The Scheme envisages the Proposed Demergers of the Demerging Businesses from the Demerging Companies into the respective Resulting Companies. In consideration thereof, the equity shares of the Resulting Companies will be issued to the equity shareholders of the Demerging Companies.

Arriving at the ratios would require determining the relative fair value of the equity shares of the Resulting Companies in terms of the relative fair value of the Demerging Businesses of the Demerging Companies i.e. a relative valuation of the businesses and equity shares of the respective companies. As per the Standards, there are several commonly used valuation approaches and methods for determining the fair value of the businesses or equity shares of a company, which can be considered for a relative valuation such as in the present case, to the extent relevant and applicable, such as:

1. Market Approach
 - a. Market Price ('MP') Method
 - b. Comparable Companies Multiple ('CCM') Method
 - c. Comparable Transaction Multiple ('CTM') Method
2. Income Approach
 - a. Discounted Cash Flow ('DCF') Method
3. Cost Approach
 - a. Replacement Cost Method
 - b. Reproduction Cost Method

The application of any particular method of valuation depends on the purpose for which the valuation is made. Although different values may exist for different purposes, it cannot be too strongly emphasised that a valuer can only arrive at one value for one purpose.

In the present case, neither the Resulting Companies, nor the Demerging Businesses are listed independently. Hence, the MP method cannot be used for the present valuation exercise. Further, based on discussions with the Companies and our independent research, we could

not find any listed companies which could be considered as closely and directly comparable to the Demerging Businesses / Resulting Companies and hence we did not apply the CCM method. Moreover, the replacement cost and reproduction cost which indicate the value of the net assets of the Demerging Businesses / Resulting Companies as at the Valuation Date are also not representative of their respective future potential since the present valuation is on a going concern basis with no intention to dispose off operating assets. Hence, we have not used these Cost Approach based methodologies.

Considering that the DCF method under the Income Approach is the most widely used method which captures the future potential of the business, we have used the DCF method for the valuation of the SME E-Commerce Services Undertaking, Themepark & Event Software Undertaking and the equity shares of DRCPL. In case of NSI and SIPL, we understand that there have been transactions in the companies and both these companies have recently issued equity shares to independent investors at arms length prices. We have accordingly used the CTM method under the Market Approach based on the above transactions for the valuation of equity shares of NSI and SIPL.

Discounted Cash Flows Method

The DCF method is considered the most theoretically sound approach and scientific and acceptable method for determination of the value of a company. Under this technique the projected free cash flows from business operations are discounted at the weighted average cost of capital to the providers of capital to the company, and the sum of the present discounted value of such free cash flows is the value of the company.

The future free cash flows are derived considering, inter alia, the changes in the working capital and investments in capital expenditure. They are an aggregation of the free cash flows during the explicit forecast period – prepared based on the business plans – and during the post explicit forecast period, estimated using an appropriate method, and are available to all providers of the company's capital - both debt and equity.

The discount rate i.e. weighted average cost of capital ('WACC'), which is applied to the free cash flows should reflect the opportunity cost to all the capital providers (namely shareholders and lenders), weighted by their relative contribution to the total capital of the company. Determining the WACC involves determining the Debt Equity ratio, Cost of Debt and the Cost of Equity.

To the value of the business so arrived at, the value of surplus / non operating assets, debt and other assets / liabilities as appropriate, if any, have to be adjusted to arrive at the total value of the business for the equity shareholders of the company.

In the present case, for the purpose of valuation of the SME E-Commerce Services Undertaking, Themepark & Event Software Undertaking and the equity shares of DRCPL:

- We have applied the DCF method to the respective projected working results as provided by the Clients. We have been provided with the projections for a period of 5 years from the Valuation Date for the explicit forecast period, by which period as informed to us by the Clients, the businesses are expected to stabilize.
- Terminal value of cash flows beyond explicit forecast period is based on the perpetuity formula on the maintainable free cash flows. For this purpose, we have considered terminal growth rates keeping in mind their growth during the respective projected periods, their long term growth potential in the respective industries and their long term expected growth in the respective economies.
- We have considered discount rates based on their respective weighted average cost of capital
- The respective operating enterprise values arrived at above have been adjusted for debt and value of surplus cash & cash equivalents and strategic investments to arrive at the equity value.
- We have also been informed that as at the Valuation Date, there are no contingent liabilities or contingent assets that could materially affect the valuation.
- The value per equity share was arrived at by dividing the value of the business for equity shareholders, arrived at above, by the respective number of diluted equity shares incorporating dilution for vested but unexercised employee stock options outstanding as at the date of this report.

Comparable Transaction Multiple Method

The CTM method is based on the premise that where there has been any recent investment / transaction either in the shares of the subject company or in companies comparable to the subject company, then the price of such investment / transaction could provide a basis for valuation. Under this method, the valuation is based on the price at which such recent investment / transaction was made, for a limited period following the date of the relevant investment / transaction.

In the present case, in case of NSI and SIPL, we have been informed by both these Companies that there have been recent investments in their respective equity shares by independent parties at arms length prices. Accordingly, we have considered the price of such recent investment as the basis for valuation of equity shares of NSI and SIPL under the CTM method.

Further, we have been informed that as at the date of this report, the business of NSI primarily constitutes the E-Commerce Business Undertaking and that remaining business of NSI is not a material portion of NSI. Accordingly, the entire value as arrived at above for NSI based on the CTM method has been ascribed to the E-Commerce Business Undertaking for the purpose of the present valuation exercise.

RECOMMENDATION OF RATIOS

The Ratios for the Proposed Demergers would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the equity shares of each company / business but at their relative values to facilitate the determination of a ratio.

The Ratios have been arrived on the basis of a relative valuation of the Demerging Businesses / Resultant Companies based on the various methodologies explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of the Demerging Businesses / Resulting Companies, having regard to information base, management representations and perceptions, key underlying assumptions and limitations.

Had different values been arrived at under different methodologies, for the purpose of recommending a ratio of entitlement it would have been necessary to arrive at a single value for the equity shares of each company, for which purpose, it would have been necessary to give appropriate weightages to the values arrived at under each methodology. In the present case, as mentioned earlier, the DCF Method was used to value the SME E-Commerce Services Undertaking, Themepark & Event Software Undertaking and the equity shares of DRCPL, and the CTM Method was used to value the equity shares of NSI and SIPL. Accordingly, 100% weightages have been given to the above respective methodologies.

Please refer Annexure 1 for summary of values of the respective Demerging Businesses / Resulting Companies which form the basis for the computation of the Ratios.

In the ultimate analysis, valuation will have to be tempered by the exercise of judicious discretion and judgment taking into account all the relevant factors. Valuation is an art, not an exact science. There will always be factors which are not evident from the face of the balance sheets but which strongly influence the value of an asset, and that is where the valuer's judgment plays a part. The determination of entitlement ratio is not a precise science and the conclusions arrived at in many cases will be subjective and dependent on the exercise of individual professional judgment. This concept is also recognized in judicial decisions. There is, therefore, no indisputable single entitlement ratio. While we have provided our recommendation of the fair equity share entitlement ratios based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the fair equity share entitlement ratios for the Proposed Demergers. The final responsibility for the determination of the entitlement ratios at which the Proposed Demergers shall take place will be with the Board of Directors of the respective companies who should take into account other factors such as their own assessment of the Proposed Demergers.

In the light of the above and on a consideration of all the relevant factors and circumstances as discussed and outlined hereinabove referred to earlier in this report, in our opinion, the fair equity share entitlement ratios for the Proposed Demerger of the Demerging Businesses into the Resulting Companies as at the Valuation Date of 31st March 2019 would be:

- **197 (One Hundred and Ninety Seven) equity shares of SIPL of INR 1/- fully paid up for every 1,500 (One Thousand Five Hundred) equity shares of IAL of INR 1/- each fully paid up for the demerger of the SME E-Commerce Services Undertaking of IAL into SIPL.**
- **110,229 (One Lakh Ten Thousand Two Hundred and Twenty Nine) equity shares of SIPL of INR 1/- fully paid up for every 20 (Twenty) equity shares of NSI of INR 10/- each fully paid up for the demerger of the E-Commerce Business Undertaking of NSI into SIPL.**
- **1 (One) equity share of DRCPL of INR 10/- fully paid up for every 412 (Four Hundred and Twelve) equity shares of IAL of INR 1/- each fully paid up for the demerger of the Themepark & Event Software Undertaking of IAL into DRCPL.**

APPROACH

Arriving at the entitlement ratios of equity Shares for the transaction would require determining the value of SME E-Commerce Services Undertaking, E-Commerce Business Undertaking and Theme park & Event Software Undertaking in terms of the value of the equity shares of Suvidhaa and DRC. These values are to be determined on a relative basis.

There are several commonly used and accepted methods for determining the value of the business/shares of the company, which has been considered in present case, to the extent relevant and applicable, including:

1. Market Approach
 - a. Comparable Companies 'Multiples method /Guideline Company Method
 - b. Historical and Current Market Price Method

Nr. Maan Residency Hotel, Nehrunagar, Ahmedabad – 380 015
Mob: +91 9662542466, 9773020484, 079-4898 2466, Email ID- shahjigarca@gmail.com

2. Income Approach
 - a. Discounted Cash Flow Method
3. Cost Approach
 - a. Net Asset Value Method(NAV)

It should be understood that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the Companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the Companies, and other factors which generally influence the Valuation of Companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Comparable Companies Multiples method /Guideline Company Method

Under this method, value of equity shares of a company is arrived at by using multiples derived from valuations of comparable companies or comparable transactions, as manifest through Stock market valuations of listed companies and the transaction valuation. This valuation is based on the principle that market valuations, taking places between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for the differences between the circumstances.

Market Price Method

The market price of an Equity share as quoted on stock exchange is normally considered as the value of the equity shares of that Company where such quotations are arising from the shares being freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares. Where shares in a company are bought and sold on the stock exchange and there are no abnormalities affecting the market price, the price at which the shares are changing hands in the ordinary course of business is usually their true value and are referred as Listed Price Method. These quotations generally reflect the value of the asset having regard to the several factors which are taken into consideration by persons who transact business on stock exchange and by buyers who want to invest their money in any particular share or shares.

Price of Recent Investment (PORI) – Under this approach, price of recent investment or transaction in the firm's equity shares at arm's length is considered. Recent investment provides a good indication of the fair market value of a company. PORI is an approach under the Market Price Method

Discounted Cash Flows (DCF) Method

Discounted Cash Flow Method ("DCF Method") is a form of the income approach that is commonly used to value businesses or equity interests. The DCF Method involves estimating the future cash flows of a business and discounting them to their present value. The discount rate selected is based on consideration of the risks inherent in the investment and market rates of return available from

B/801, Gopal Palace, Nr. Shiromani Complex, Nehrunagar Cross Road,

alternative investments of similar type and quality as of the Valuation Date. DCF Method is based on the concepts of "Time Value of Money" which states "cash today is more worth than the same amount of cash in the future."

We must emphasize that realization of free cash flow forecast used in the analysis will be dependent on the continuing validity of assumptions on which they are based. Our analysis therefore, will not, and cannot be directed to providing any assurance about the achievability of the final projections. Since the financial forecast relate to future, actual results are likely to be different from the projected results because events and circumstances do not occur as expected, and the differences could be material.

Net Asset Value (NAV) Method

The Asset based valuation technique is based on the value of the underlying net assets of the business either on a book value basis or realizable value basis or replacement cost basis. This valuation approach is mainly used in case where the firm is to be liquidated ie.it does not meet the "going concern" criteria or in case where the asset base dominate earnings capability.

For arriving at the fair value of the equity shares of Suvidhaa and NSI / E-Commerce Business Undertaking, we have used Pori Method within the Market Approach. Since the fair value derived based on the Market Approach are regarded as the good barometer of fair value of the equity shares at which an informed buyer and an informed seller are willing to transact in the equity shares of the company, we have assigned 100% weightage to the Market Approach.

For arriving at the fair value of the SME E-Commerce Services Undertaking and Theme park & Event Software Undertaking of Infibeam and shares of DRC, we have used the DCF Method within Income Approach. We have assigned 100% weightage to Income Approach.

CONCLUSION

Though different values have been arrived at under each of the above approaches, for the purposes of recommending share entitlement ratios, it is necessary to arrive at a single value for the shares of both the Companies. It is, however, important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of each of the Companies. Our exercise is to work out relative values of shares of the Companies. For the purpose, it is necessary to give appropriate weightage to the values arrived at under each approach discussed above.

The entitlement ratios proposed for the transactions has been arrived on the basis of a relative valuation of the Companies and demerging Undertakings based on the various methodologies explained herein earlier and various qualified factors relevant to each company, having regard to information base, key underlying assumptions and limitations.

In the ultimate analysis, valuation will have to be tempered by the exercise of judicious discretion and judgment taking into account all the relevant factors. There will always be several factors, e.g. quality and integrity of the management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share.

Again, it is understood that this analysis does not represent a fairness opinion.

Computation of exchange ratio

Valuation Approach		Asset Approach	Income Approach	Market Approach	Relative Value Per Share
SME E-Commerce Services Undertaking	Value Per Share	-	7.90	-	7.90
	Weight		0%	100%	0%
E-Commerce Business Undertaking	Value Per Share	-	-	3,30,687.00	3,30,687.00

	Weight		0%	0%	100%
DRC Systems India Private Limited	Value Per Share	-	123.71	-	123.71
	Weight		0%	100%	0%

In light of the above, and on a consideration of all relevant factors and circumstances as discussed and outlined hereinabove, we consider that the entitlement ratios for the transactions should be:

Independent Auditor's Report on Statement of Audited Standalone Financial Results for the quarter and year ended March 31, 2020 of Infibeam Avenues Limited Pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended

**TO THE BOARD OF DIRECTORS OF
INFIBEAM AVENUES LIMITED
(Formerly known as Infibeam Incorporation Ltd)**

Report on audit of Standalone Financials Results

Opinion

We have audited the accompanying Statement of Audited Standalone Financial Results of Infibeam Avenues Limited (Formerly known as Infibeam Incorporation Ltd) ('the Company') for the quarter and year ended March 31, 2020 ('the Statement') attached herewith, being submitted by the company pursuant to the requirement of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended ("Listing Regulations").

In our opinion and to the best of our information and according to the explanations given to us, the Statement:

- i. is presented in accordance with the requirements of Regulation 33 of the of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended; and
- ii. gives a true and fair view in conformity with the recognition and measurement principles laid down in the Indian Accounting Standards and other accounting principles generally accepted in India of the net profit and other comprehensive income and other financial information of the Company for the quarter and year ended March 31, 2020.

Basis of Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013 (the Act). Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Standalone Financial Results" section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial results under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's Responsibility for the Standalone Financial Results

The Statement has been prepared on the basis of the standalone annual financial statements. The Company's Board of Directors are responsible for the preparation of these financial results that give a true and fair view of the net profit/loss and other comprehensive income and other financial information in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, 'Interim Financial Reporting' prescribed under Section 133 of the Act read with relevant rules issued thereunder and other accounting principles generally accepted in India and in compliance with Regulation 33 of the Listing Regulations. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial results that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial results, the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditors Responsibilities for the Audit of Standalone Financial Results

Our objectives are to obtain reasonable assurance about whether the standalone financial results as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial results.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial results, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial results or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial results, including the disclosures, and whether the financial results represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The Statement includes the results for the quarter ended March 31, 2020 being the balance figures between the audited figures in respect of the full financial year ended March 31, 2020 and the published unaudited year-to-date figures up to the end of the third quarter of the current financial year, which were subject to limited review by us, as required under the Listing Regulations.

- 7 Covid-19 impact on Q4 and FY20 financials, and operational trends observed during the period after the balance date

The Company has evaluated the impact of this pandemic on its business operations, liquidity and financial position and based on management's review of current indicators and economic conditions there is no material impact on its financial results as at March 31, 2020. However, the impact assessment of COVID-19 is a continuing process given the uncertainties associated with its nature and duration, and accordingly the impact may be different from that estimated as at the date of approval of these financial results. The Company will continue to monitor any material changes to future economic conditions.

The Company, however, in the interest of all stakeholders and following highest level of corporate governance presents the following trends observed in March (forming part of the financial results as at March 31, 2020), April and May 2020 across its FinTech business; Digital Payments and Enterprise Software Platforms.

Operational Impact

Digital Payments Business

In March 2020, before complete lockdown, from 1st to 24th, in India, the Company was processing payments at an annualised run rate of INR 75,000 crore. In the lockdown period of March 2020, 25th to 31st, the average daily payments processing volume (Volume) fell 30% compared to pre-lockdown period of March 2020.

In the month of April, the month of complete lockdown in India, there was a dip in Volume, compared to daily average of full month of March 2020, by 22%. However, in May 2020, the average daily payments processing value (Value) grew 32% with 14% growth in volume, compared to April 2020, as there were partial relaxations in May 2020. With further relaxations announced from June 2020 we believe usage will return to normal soon and start growing.

In the UAE, we observed a different trend. The value and volume both increased in April 2020 as well as in May 2020, month on month. The value increased by 29% in April 2020 sequentially over March 2020 and 10% sequentially over April 2020. The volume increased 37% in April 2020 sequentially over March 2020 and 7% in Ramadan May 2020 sequentially over April 2020. Last year during Ramadan May 2019, the value and volume both fell by 10% and 8% respectively, sequentially compared to April 2020. However, the value and volume in Ramadan May 2020 increased 60% and 43%, respectively, compared to the period of Ramadan May 2019.

We are also seeing an increased usage in bill payments through NPCI's Bharat BillPay (BBPS) infrastructure. Number of billers on BBPS has increased from 182 in March 2020 to 216 in May 2020 while the monthly volume has increased from 15.8 million to 16.5 million, respectively. The Company's bill payments value and volume increased by 91% and 93%, respectively in FY20 compared to FY19. Post Covid-19 outbreak, we have seen a strong uptake in gas cylinder bookings through BBPS as currently we are the exclusive non-bank bill processor for all three gas cylinder providers in India namely, IOCL, BPCL and HPCL.

Enterprise Software Platforms Business

Our Platforms business is largely made up of transactions based and pre-determined contracts with our enterprise clients. There are a few fixed price for Platform subscription where we generate monthly or quarterly invoice for additional requirements and other support services that are required by our clients on an on-going basis. Hence, these contracts and their billings are not materially impacted.

For transaction-based contract with GeM and others where, majority of the revenue is tied to the order booking of procurement of goods and services by GeM. Basis the reforms announced by the Government, with a special focus on MSME, the company believes that, with the fast acceleration of closure of contract, the Company will be able to accelerate collections from GeM which will improve its cash position.

Our View

The full extent to which the pandemic will impact Company's future financial results will depend upon upcoming developments, which are fairly uncertain.

We are hopeful that the overall digital transactions in the economy will increase as the economy gradually opens, mitigating the pandemic challenges.

Our priority will remain to safeguard the health and well-being of our employees and the community we serve and stay with, while continuing our business operations.

Segment liabilities include all operating liabilities and consist principally of trade payables and accrued liabilities. Segment assets and liabilities do not include those relating to income taxes.

3. Segment expense:

Segment expense comprises the expense resulting from the operating activities of a segment that is directly attributable to the segment or that can be allocated on a reasonable basis to the segment and expense relating to transactions with other segments. Certain expenses are not specifically allocable to individual segments as the underlying services are used interchangeably. The Group therefore believes that it is not practicable to provide segment disclosures relating to such expenses, and accordingly such expenses are separately disclosed as 'unallocated' and directly charged against total income.

7. Covid-19 Impact on Q4 and FY20 financials, and operational trends observed during the period after the balance date

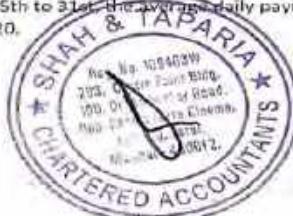

The Company has evaluated the impact of this pandemic on its business operations, liquidity and financial position and based on management's review of current indicators and economic conditions there is no material impact on its financial results as at March 31, 2020. However, the impact assessment of COVID-19 is a continuing process given the uncertainties associated with its nature and duration, and accordingly the impact may be different from that estimated as at the date of approval of these financial results. The Company will continue to monitor any material changes to future economic conditions.

The Company, however, in the interest of all stakeholders and following highest level of corporate governance presents the following trends observed in March (forming part of the financial results as at March 31, 2020), April and May 2020 across its FinTech business, Digital Payments and Enterprise Software Platforms.

Operational Impact

Digital Payments Business

In March 2020, before complete lockdown, from 1st to 24th, in India, the Company was processing payments at an annualised run rate of INR 75,000 crore. In the lockdown period of March 2020, 25th to 31st, the average daily payments processing volume (Volume) fell 30% compared to pre-lockdown period of March 2020.

In the month of April, the month of complete lockdown in India, there was a dip in Volume, compared to daily average of full month of March 2020, by 22%. However, in May 2020, the average daily payments processing value (Value) grew 32% with 14% growth in volume, compared to April 2020, as there were partial relaxations in May 2020. With further relaxations announced from June 2020 we believe usage will return to normal soon and start growing.

In the UAE, we observed a different trend. The value and volume both increased in April 2020 as well as in May 2020, month on month. The value increased by 29% in April 2020 sequentially over March 2020 and 10% sequentially over April 2020. The volume increased 37% in April 2020 sequentially over March 2020 and 7% in Ramadan May 2020 sequentially over April 2020. Last year during Ramadan May 2019, the value and volume both fell by 10% and 8% respectively, sequentially compared to April 2020. However, the value and volume in Ramadan May 2020 increased 60% and 43%, respectively, compared to the period of Ramadan May 2019.

We are also seeing an increased usage in bill payments through NPCI's Bharat BillPay (BBPS) infrastructure. Number of billers on BBPS has increased from 182 in March 2020 to 215 in May 2020 while the monthly volume has increased from 15.8 million to 16.5 million, respectively. The Company's bill payments value and volume increased by 91% and 93%, respectively in FY20 compared to FY19. Post Covid-19 outbreak, we have seen a strong uptake in gas cylinder bookings through BBPS as currently we are the exclusive non-bank bill processor for all three gas cylinder providers in India namely, IOCL, BPCL and HPCL.

Enterprise Software Platforms Business

Our Platforms business is largely made up of transactions based and pre-determined contracts with our enterprise clients. There are a few fixed price for Platform subscription where we generate monthly or quarterly invoice for additional requirements and other support services that are required by our clients on an on-going basis. Hence, these contracts and their billings are not materially impacted.

For transaction-based contract with GeM and others where, majority of the revenue is tied to the order booking of procurement of goods and services by GeM. Basis the reforms announced by the Government, with a special focus on MSME, the company believes that, with the fast acceleration of closure of contract, the Company will be able to accelerate collections from GeM which will improve its cash position.

Our View

The full extent to which the pandemic will impact Company's future financial results will depend upon upcoming developments, which are fairly uncertain.

We are hopeful that the overall digital transactions in the economy will increase as the economy gradually opens, mitigating the pandemic challenges.

Our priority will remain to safeguard the health and well-being of our employees and the community we serve and stay with, while continuing our business operations.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ('Act') in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2020, its Profit and cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the standards on auditing specified under section 143 (10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the code of ethics.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Reporting of key audit matters as per SA 701, Key Audit Matters are not applicable to the Company as it is an unlisted Company.

Information other than the financial statements and auditors' report thereon

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Business Responsibility Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

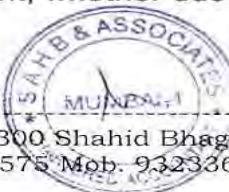

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's board of directors are responsible for the matters stated in section 134 (5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting standards specified under section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The boards of directors are also responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**Annexure II to the Independent Auditors' Report
(Referred to in our report of even date)**

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **SUVIDHAA INFOSERVE LIMITED** ("the Company") as at 31st March, 2020 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Control over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their

operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that:

- (1) pertains to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Any revision to the accounting estimates is recognized prospectively in current and future periods.

3 Significant accounting policies (Continued)

Operating cycle

Operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. Based on the nature of the service and the time between the acquisition of assets and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

3.4 Fixed assets and depreciation

Tangible fixed assets

Fixed assets are stated at cost of acquisition less accumulated depreciation/ amortization and impairment loss, if any. Cost comprises of purchase price and any attributable cost such as inward freight, duties, taxes (to the extent not recoverable from tax authorities) and expenses incidental to acquisition/construction and installation of the assets.

A fixed asset is eliminated from the financial statements on disposal or when no further benefit is expected from its use and disposal.

Gains or losses arising from retirement or gains or losses arising from disposal of fixed assets are recognised in the statement of profit and loss.

Cost of assets not ready for their intended use as at balance sheet date are disclosed under capital work-in-progress. Advances paid towards the acquisition of the fixed assets as at balance sheet date are disclosed under long-term loans and advances.

Depreciation is provided on a pro-rata basis on the straight line method as prescribed under Schedule II to the Companies Act, 2013 with the exception of the following:

- Individual assets costing less than INR 5,000 are depreciated in full in the year of acquisition.

- Leasehold improvements are depreciated over lease period or useful life of the assets whichever is lower.

Asset group	No. of years
Computer and equipment	3-6
Office equipment	5
Motor car	8
Furniture and fixtures	10

Intangible fixed assets

Intangible assets that are acquired by the Company are measured initially at cost. After initial recognition, an intangible asset is carried at cost less any accumulated amortisation and any accumulated impairment loss. Subsequent expenditure is capitalised only when it increases the future economic benefits from the specific asset to which it relates.

In accordance with the applicable Accounting Standard, the Company follows a rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use. However, if there is a persuasive evidence that the useful life of an intangible asset is longer than ten years, it is amortised over the best estimate of its useful life. Such intangible assets are tested annually for impairment.

Software is amortized over the period of license or 5 years, whichever is lower.

Amortisation method and useful lives of fixed assets are reviewed at each reporting date. If the useful life of an asset is estimated to be significantly different from previous estimates, the amortisation period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortisation method is changed to reflect the changed pattern. An intangible asset is derecognised on disposal or when no future economic benefits are expected from its use and disposal. Gains or losses arising from disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss.

Advance paid/expenditure incurred on acquisition/ construction of fixed assets which are not ready for their intended use at each balance sheet are disclosed under loans and advances on capital account or intangible assets under development.

3.5 Impairment of assets

The carrying amounts of assets are reviewed at each balance sheet date to determine if there is any indication of an impairment based on external / internal factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount, which represents the greater of the net selling price and 'Value in use' of the respective assets. If, at the balance sheet date, there is any indication that the previously assessed impairment loss no longer exists, then such loss is reversed and asset is restated to the effect.

Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life.

Lease rentals incurred under operating lease arrangements are charged to the statement of profit and loss on a straight line basis over the lease term.

3.7 Revenue recognition

The Company derives its revenues primarily from services which includes domestic remittance, booking of rail, air and bus tickets, mobile recharges, payment of bills, insurance premium, advertisement, promotion, technology support etc. Services are rendered through distributors, retailers and other network which is classified as "Sale of Services" under revenue from operation.

Revenue comprises of commission, marketing, promotion and technology support services are recognized once the service is rendered and no significant uncertainty exists regarding the amount of consideration and excludes applicable taxes.

Revenue also comprises of one - time activation fees received from distributors and retailers for activation of their account and recognised on activation.

Interest income is recognized on a time proportion basis.

3.8 Foreign currency transactions

Foreign currency transactions are recorded into Indian Rupees at the exchange rate prevailing on the date of the respective transaction. Exchange rate differences arising on foreign currency transactions, between the actual rate of settlement and the rate on the date of transaction, is charged or credited to the statement of profit and loss. Monetary assets and liabilities denominated in foreign currencies as at the Balance sheet date are translated at the closing exchange rate on that date; the resultant exchange differences are recognized in the statement of profit and loss.

Non-monetary foreign currency items are carried at historical cost denominated in a foreign currency and reported using the exchange rate at the date of transaction.

3.9 Employee benefits

a) Short-term employee benefits

Employee benefits payable wholly within twelve months of receiving employee services are classified as short-term employee benefits. These benefits include salaries and wages, bonus, ex-gratia and compensated absences such as paid annual leave. The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is charged to the statement of profit and loss in the period in which such services are rendered.

b) Post-employment benefits

i) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays specified contributions to a separate entity and has no obligation to pay further amounts. The Company makes specified monthly contributions towards employee provident fund to Government administered provident fund scheme which is a defined contribution plan. The Company's contribution is recognised as an expense in the statement of profit and loss during the period in which the employee renders the related service.

ii) Defined benefit plans

The Company's gratuity benefit scheme is a defined benefit plan. The Company's net obligation in respect of the gratuity benefit scheme is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value. Any unrecognised past-service costs and the fair value of any plan assets are deducted. The calculation of the Company's obligation under such defined benefit plan is performed annually by a qualified actuary using the projected unit credit method.

The Company recognises all actuarial gains and losses arising from defined benefit plans immediately in the statement of profit and loss. All expenses related to defined benefit plans are recognised in employee benefits expense in the statement of profit and loss. When the benefits of a plan are improved, the portion of the increased benefit related to past service by employees is recognised in statement of profit and loss on a straight-line basis over the average period until the benefits become vested.

The Company recognises gains and losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs.

c) Compensated absences

The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods. Since the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilized wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Company records an obligation for such compensated absences in the period in which the employee renders the services that increase this entitlement. The obligation is measured on the basis of independent actuarial valuation using the projected unit credit method.

for the year ended 31 March 2020

(Currency : Indian rupees)

3 Significant accounting policies (Continued)

3.10 Earnings per share ('EPS')

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

3.11 Income taxes

Income tax expense comprises of current tax expense and deferred tax expense or credit computed in accordance with the relevant provisions of the Income Tax Act 1961.

Current taxes

Provision for current taxes is recognised under the taxes payable method based on the estimated tax liability computed after taking credit for allowances and exemptions in accordance with the Indian Income-tax Act, 1961. Provision for Income Tax has been computed on the higher of the Minimum Alternate Tax (MAT) in accordance with Section 115JB of the Income Tax Act, 1961 and under the normal provisions of the Income-tax Act, 1961. MAT credit is recognized only to the extent there is convincing evidence that the Company will pay normal income tax in excess of MAT during the specified period.

Deferred taxes

Deferred tax assets and liabilities are recognised for the future tax consequences attributable to timing differences between the profits offered for income taxes and the profits as per the financial statements of the Company. Deferred tax assets and liabilities are measured using the tax rates and the tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carry forward loss under applicable taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realised.

3.12 Provisions and contingencies

The Company creates a provision when there is a present obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible or a present obligation that may arise, as a result of a past event, and where it is not probable that an outflow of resources will be required to settle the obligation and the amount can be reasonably estimated. When there is a possible obligation (or a present obligation) in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognized in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the period in which the change occurs.

Loss contingencies arising from claims, litigation, assessment, fines, penalties, etc. are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated.

3.13 Employee Stock Option Plan ('ESOP')

The Company adopted Guidance note on Accounting for Employee Share-based Payments, issued by the Institute of Chartered Accountants of India, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors including employee stock options and employee stock purchases based on estimated fair values. The Company follows the Intrinsic Value method for measuring compensation cost for stock options. Such compensation cost is recorded over the vesting period of the stock options. The market value of the share is determined based on valuation report obtained from an independent registered valuer.

3.14 Cash and cash equivalents

Cash and cash equivalents comprises of cash and balances with banks.

3.15 Cash flow statement

Cash flows are reported using the indirect method, whereby net profit before tax is adjusted for the effects of transactions of non cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

ANNEXURE B TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in clause (f) of paragraph 2 under 'Report on other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

We have audited the internal financial controls over financial reporting of **DRC Systems India Limited** (*Formerly Known as DRC Systems India Private Limited*) as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the

financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

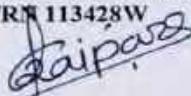

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company manages market risk through a treasury department, which evaluates and exercises independent control over the entire process of market risk management. The treasury department recommends risk management objectives and policies, which are approved by Board of Directors. The activities of this department include management of cash resources, borrowing strategies, and ensuring compliance with market risk limits and policies.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. 2. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investments in debt securities.

The carrying amount of following financial assets represent the maximum credit exposure:

Cash and cash equivalents

The company maintains its Cash and Cash equivalents and Bank deposits with banks having good reputation, good past track record and high quality credit rating and also reviews their creditworthiness on an ongoing basis.

Trade receivables

Trade receivables of the company are typically unsecured. Credit risk is managed through credit approvals and periodic monitoring of the creditworthiness of customers to which company grants credit terms in the normal course of business. The company performs ongoing credit evaluation of its customers' financial condition and monitors the creditworthiness of its customers to which it grants credit terms in the normal course of business. The allowance for impairment of Trade receivables is created to the extent and as and when required, based upon the expected collectability of accounts receivable. The above receivables which are past due but not impaired are measured at fair value less cost to sell and relate to a number of independent third party customers from whom there is no record of default. These financial assets were not impaired as they had not been significantly impaired in credit quality and the outcome is not considered reasonably possible based on the status of the activity of the customer to which it relates which they belong and the type of customers. DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

(Currency: Indian Rupees)

1. Company Overview and Significant Accounting Policies

a. Company overview

DRC Systems India Limited *(formerly known as DRC Systems India Private Limited)* ('the Company') was incorporated on April 27, 2012 under the Companies Act, 1956. The Company is a service company and its principal activities comprise of software development, information technology consulting services and recruitment related services.

b. Basis of preparation of financial statements

These financial statements are prepared in accordance with Indian Accounting Standards (Ind AS) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values, the provisions of the Companies Act, 2013 ('Act') (to the extent notified). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The Company has adopted all the Ind AS standards and the adoption was carried out in accordance with Ind AS 101 - First time adoption of Indian Accounting Standards. The transition was carried out from Indian Accounting Principles generally accepted in India as prescribed under Sec 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (IGAAP), which was the previous GAAP.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

c. Critical accounting estimates

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

1. Estimates and assumption

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

2. Defined benefit plans

The cost of the defined benefit plans and the present value of the obligation are determined using actuarial

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The parameter most subject to change is the discount rate. Discount rate has been determined by reference to market yields on the government bonds as at the balance sheet date. The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at intervals in response to demographic changes. Future salary increases are based on expected future inflation rates for the country.

Further details about defined benefit obligations are provided in Note 23.

3. Taxes

Deferred tax assets are recognised for unused tax credits to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

4. Intangible asset including intangible asset under development

Intangible development costs are capitalised as and when technical and commercial feasibility of the asset is demonstrated, future economic benefits are probable. The costs which can be capitalized include the salary and ESOP cost of employees that are directly attributable to development of the asset for its intended use. Research and maintenance costs are expensed as incurred. Intangible assets are tested for impairment whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. Refer Note 2.5 for the estimated useful life of Intangible assets. The carrying value of Intangible assets has been disclosed in Note 4.

5. Property, plant and equipment

Refer Note 2.4 for the estimated useful life of Property, plant and equipment. The carrying value of Property, plant and equipment has been disclosed in Note 3.

6. Revenue recognition

Revenue is recognized upon transfer of control of promised services to customers in an amount that reflects the consideration which the company expects to receive in exchange for those services.

2. Summary of Significant Accounting Policies

The following are the significant accounting policies applied by the company in preparing its financial statements:

- Expected to be realised within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.2 Foreign currencies

The company's financial statements are presented in INR, which is also the company's functional currency.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Company at the functional currency spot rate at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange differences arising on settlement or translation of monetary items are recognised in statement of profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or statement of profit or loss are also recognised in OCI or profit or loss, respectively).

2.3 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability
- Or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, as described below, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Significant accounting judgements, estimates and assumptions
- Quantitative disclosures of fair value measurement hierarchy
- Financial instruments (including those carried at amortised cost)

2.4 Property, plant and equipment

The Company has elected to continue with the carrying value for all of its property, plant and equipment's assets as recognised in its previous GAAP financial as deemed cost at the transition date, i.e., 1 April 2015.

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of Property, plant and equipment are required to be replaced at intervals, the Company recognises such parts as individual assets with specific useful lives and depreciates them accordingly. All repair and maintenance costs are recognised in statement of profit or loss as incurred.

Capital work-in-progress comprises cost of fixed assets that are not yet installed and ready for their intended use at the balance sheet date.

Depreciation is calculated on a written down value basis over the estimated useful lives of the assets as follows.

- Plant and equipment - 5 to 10 years
- Furniture & Fixtures - 10 years
- Computer & Peripherals - 3 to 6 years

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised.

2.5 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Cost include acquisition and other incidental cost related to acquiring the intangible asset.

Research costs are expensed as incurred. Intangible development costs are capitalised as and when technical and commercial feasibility of the asset is demonstrated, future economic benefits are probable. The costs which can be capitalized include the salary and ESOP cost of employees that are directly attributable to development of the asset for its intended use.

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss.

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

Amortisation

Period of Amortisation of Intangibles is calculated as follows:

- Internally generated /Acquired Computer Software – 3 to 5 years

Intangible assets under development

Expenditure incurred on acquisition /construction of intangible assets which are not ready for their intended use at balance sheet date are disclosed under intangible assets under development. During the period of development, the asset is tested for impairment annually.

2.6 Leases

Company as a lessee

A lease is classified at the inception date as a finance lease or an operating lease. Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to statement of profit and loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases. Initial direct costs incurred specifically for an operating leases are deferred and charged to the statement of profit and loss over the lease term.

2.7 Impairment of non-financial assets

Non-financial assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generated unit (CGU) to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognized in the Statement of Profit and Loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the statement of profit and loss if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

2.8 Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

2.9 Revenue Recognition

Rendering of services

Revenue is recognised upon transfer of control of promised services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those services.

Revenue from Web Services is recognised upfront at the point in time when the service is delivered to the customer. In cases where implementation and / or customisation services rendered significantly modifies or customises, these service is recognised proportionally over the period.

Revenue is measured based on the consideration specified in a contract with the customer and excludes amounts collected on behalf of customers. The Company presents revenue net of discounts and collection charges. Revenue also excludes taxes collected from customers.

Revenue from related parties are recognised based on transaction price which is at arm's length.

Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled revenue (only act of invoicing is pending) when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

Excess billing over revenue ("contract liability") is recognised when there is billing in excess of revenues.

In accordance with Ind AS 37, the Company recognises an onerous contract provision when the unavoidable costs of meeting the obligations under a contract exceed the economic benefits to be received.

Contracts are subject to modification to account for changes in contract specification and requirements. The Company reviews modification to contract in conjunction with the original contract, basis which the transaction price could be allocated to a new performance obligation, or transaction price of an existing obligation could undergo a change. In the event transaction price is revised for existing obligation, a cumulative adjustment is accounted for.

The Company disaggregates revenue from contracts with customers by offering and geography.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

payment for performance to date as per contract.

Refer note 32(d) for impact on adoption of Ind AS 115.

Interest income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR). The EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the statement of profit or loss.

Export incentives

Export incentives are accounted on accrual basis based on services rendered.

2.10 Financial instruments – initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a) **Financial assets**

(i) **Initial recognition and measurement.**

All financial assets, except investment in subsidiaries and joint ventures, are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial assets.

(ii) **Subsequent measurement**

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments at fair value through profit or loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income (FVTOCI)
- Equity instruments measured at fair value through statement of profit and loss (FVTPL)
- Debt instruments at amortised cost;

A debt instrument is measured at amortised cost if both the following conditions are met:

- the asset is held within a business model whose objective is to hold assets for collecting contractual cash flows; and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

- **Debt instruments at fair value through other comprehensive income (FVTOCI)**

A debt instrument is measured at fair value through other comprehensive income if both of the following criteria are met:

- the objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- the asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, interest income, impairment losses & reversals and foreign exchange gain or loss are recognised in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to statement of profit and loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

- **Debt instruments at fair value through profit or loss (FVTPL)**

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or fair value through other comprehensive income criteria, as at fair value through profit or loss. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the Statement of profit and loss.

- **Equity instruments:**

All equity investments in scope of Ind-AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

- **Investment in subsidiaries and associates:**

Investment in subsidiaries and associates is carried at cost in the standalone financial statements.

- (iii) **Derecognition of financial assets**

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

- (iv) **Impairment of financial assets**

The Company recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised is recognized as an impairment gain or loss in profit or loss.

- b) Financial Liabilities**

- (i) Initial recognition and measurement**

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings.

(ii) Subsequent measurement of financial liabilities

The measurement of financial liabilities depends on their classification, as described below:

- Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind-AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risks are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit and loss. The Company has not designated any financial liability as at fair value through profit and loss.

- Loans and Borrowings

After initial recognition, interest-bearing borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

This category generally applies to borrowings.

(iii) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

c) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.11 Cash and cash equivalent

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

2.12 Taxes

Tax expense comprises of current income tax and deferred tax.

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Current income tax relating to items recognised outside Statement of profit and loss is recognised outside Statement of profit and loss (either in other comprehensive income or equity). Current tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside Statement of profit and loss is recognised outside Statement of profit and loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

The Company does not recognize tax credits in the nature of MAT credit as an asset since there is no convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which tax credit is allowed to be carried forward. In the future year in which the Company recognizes tax credits as an asset, the said asset will be created by way of tax credit to the Statement of profit and loss.

2.13 Retirement and other employee benefits

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

a) Short Term Employee Benefits

All employee benefits payable within twelve months of rendering the service are classified as short term employee benefits. The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the year.

b) Post-Employment Benefits

(i) Defined benefit plan

Gratuity benefit scheme is a defined benefit plan. The present value of the obligation under such defined benefit plans is determined based on the actuarial valuation using the Projected Unit Credit Method as at the date of the Balance sheet reduced by the fair value of any plan assets. The discount rate used for determining the present value of the obligation under defined benefit plan, are based on the market yields on Government securities as at the balance sheet date.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the Balance Sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to Statement of Profit and Loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment; and
- The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the Statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

The Company has not invested in any fund for meeting liability.

2.14 Employee stock option schemes

The Employees Stock Option Scheme ('the Scheme') provides for grant of equity shares of Infibeam Avenues Limited (formerly known as Infibeam Incorporation Limited) (the holding company) to employees of the Company. The scheme provides that employees are granted an option to subscribe to equity share of the holding company that vest in a graded manner. The options may be exercised within specified period. The holding company follows the fair value method to account for its stock based employee compensation plans. The expense recognised in the Statement of profit and loss for a period represents the cost charged by the holding company net of cost recovered from fellow subsidiaries on proportionate basis.

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

2.15 Earnings per share

Basic EPS amounts are calculated by dividing the profit or loss for the year attributable to equity shareholders for the period by the weighted average number of equity shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit or loss attributable to equity shareholders for the period by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

2.16 Segment reporting

Based on "Management Approach" as defined in Ind AS 108 -Operating Segments, the Chief Operating Decision Maker evaluates the Company's performance and allocates the resources based on an analysis of various performance indicators by business segments. Unallocable items includes general corporate income and expense items which are not allocated to any business segment.

Segment policies:

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole. Common allocable costs are allocated to each segment on an appropriate basis.

2.17 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingencies

Provision in respect of contingencies relating to claims, litigation, assessment, fines, penalties etc. are recognised when it is probable that a liability has been incurred and the amount can be estimated reliably.

Contingent liabilities and contingent assets:

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognised nor disclosed in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognised in the period in which the change occurs.

2.18 Changes in accounting policies and disclosures

New and amended standards

The Company applied Ind AS 116 Leases for the first time. The nature and effect of the changes as a result of adoption of this new accounting standard is described below. Several other amendments apply for the first time for the year ending March 31, 2020, but do not have an impact on the financial statements of the Company.

(i) Ind AS 116 Leases

Ind AS 116 supersedes Ind AS 17 Leases including its appendices (Appendix C of Ind AS 17 Determining whether an Arrangement contains a Lease, Appendix A of Ind AS 17 Operating Leases-Incentives and Appendix B of Ind AS 17 Evaluating the Substance of Transactions Involving the Legal Form of a Lease). The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to recognise most leases on the balance sheet. Lessor accounting under Ind AS 116 is substantially unchanged from Ind AS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in Ind AS 17. Therefore, Ind AS 116 does not have an impact for leases where the Company is the lessor.

These amendments have no impact on the standalone financial statements of the Company.

(ii) Appendix C to Ind AS 12 Uncertainty over Income Tax Treatment

The appendix addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of Ind AS 12 and does not apply to taxes or levies outside the scope of Ind AS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments. The Interpretation specifically addresses the following:

1. Whether an entity considers uncertain tax treatments separately
2. The assumptions an entity makes about the examination of tax treatments by taxation authorities
3. How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
4. How an entity considers changes in facts and circumstances

The Company determines whether to consider each uncertain tax treatment separately or together with one

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

or more other uncertain tax treatments and uses the approach that better predicts the resolution of the uncertainty. In determining the approach that better predicts the resolution of the uncertainty, the Company has considered, for example; (a) how it prepares its income tax filings and supports tax treatments; or (b) how the entity expects the taxation authority to make its examination and resolve issues that might arise from that examination.

The Company determined, based on its tax compliance, that it is probable that its tax treatments will be accepted by the taxation authorities. The Appendix did not have an impact on the standalone financial statements of the Company.

(iii) Amendments to Ind AS 109: Prepayment Features with Negative Compensation

Under Ind AS 109, a debt instrument can be measured at amortised cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to Ind AS 109 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract.

These amendments have no impact on the standalone financial statements of the Company.

(iv) Amendments to Ind AS 19: Plan Amendment, Curtailment or Settlement

The amendments to Ind AS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- (a) Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event.
- (b) Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments had no impact on the standalone financial statements of the Company as it did not have any plan amendments, curtailments, or settlements during the period.

(v) Amendments to Ind AS 28: Long-term Interests in associates and joint ventures

The amendments clarify that an entity applies Ind AS 109 to long-term interests in an associate or joint

venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (longterm interests). This clarification is relevant because it implies that the expected credit loss model in Ind AS 109 applies to such long-term interests.

The amendments also clarified that, in applying Ind AS 109, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognised as adjustments to the net investment in the associate or joint venture that arise from applying Ind AS 28 Investments in Associates and Joint Ventures.

These amendments had no impact on the standalone financial statements as the Company is in compliance with the said amendment.

2.19 Annual Improvements to Ind AS 2018

(i) Ind AS 103 Business Combinations

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation. An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 April 2019.

These amendments had no impact on the standalone financial statements of the Company as there is no transaction where joint control is obtained.

(ii) Ind AS 111 Joint Arrangements

An entity that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in Ind AS 103. The amendments clarify that the previously held interests in that joint operation are not remeasured. An entity applies those amendments to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after April 1, 2019.

These amendments had no impact on the standalone financial statements of the company as there is no transaction where a joint control is obtained.

(iii) Ind AS 12 Income Taxes

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognises the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where it originally recognised those past transactions or events.

DRC Systems India Limited

(formerly known as DRC Systems India Private Limited)

Notes to the Financial Statements for the year ended 31 March 2020

An entity applies the amendments for annual reporting periods beginning on or after 1 April 2019. Since the Company's current practice is in line with these amendments, they had no impact on the standalone financial statements of the Company.

(iv) Ind AS 23 Borrowing Costs

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete. The entity applies the amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after 1 April 2019. Since the Company's current practice is in line with these amendments, they had no impact on the standalone financial statements of the Company.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1. Corporate Information

NSI Infinium Global Limited (formerly known as NSI Infinium Global Private Limited) ('the Company') was incorporated under the Companies Act, 1956. 2. Basis of preparation

These financial statements are prepared in accordance with Indian Accounting Standards (Ind AS) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values, the provisions of the Companies Act, 2013 ('Act') (to the extent notified). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The financial statements have been prepared on a historical cost basis. The financial statements are presented in Indian Rupees. These financial statements are the separate financial statements of the Company.

3. Critical accounting estimates

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

3.1. Estimates and assumption

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

3.2. Defined benefit plans

The cost of the defined benefit plans and the present value of the obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The parameter most subject to change is the discount rate. Discount rate has been determined by reference to market yields on the government bonds as at the balance sheet date. The mortality rate is based on publicly available mortality

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

tables. Those mortality tables tend to change only at intervals in response to demographic changes. Future salary increases are based on expected future inflation rates for the country.

Further details about defined benefit obligations are provided in Note 28.

3.3. Taxes

Deferred tax assets are recognised for unused tax credits to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. During the year, considering the above factors, no deferred tax assets is recognised.

3.4. Intangible assets including under development

Intangible development costs are capitalised as and when technical and commercial feasibility of the asset is demonstrated, future economic benefits are probable. The costs which can be capitalized include the salary and ESOP cost of employees that are directly attributable to development of the asset for its intended use. Research and maintenance costs are expensed as incurred. Intangible assets are tested for impairment whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. Refer Note 4.5 for the estimated useful life of intangible assets. The carrying value of intangible assets has been disclosed in Note 6.

3.5. Property, plant and equipment

Refer Note 4.4 for the estimated useful life of Property, plant and equipment. The carrying value of Property, plant and equipment has been disclosed in Note 5. The useful life and residual value is reassessed annually.

3.6. Revenue recognition

Revenue from sale of products is recognised when the risks and rewards of ownership are transferred to customers. Revenue is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. Revenue from the services rendered is recognized upon transfer of control of promised services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those services.

4. Summary of Significant Accounting Policies

The following are the significant accounting policies applied by the company in preparing its financial statements:

4.1. Current versus non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current. Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

4.2. Foreign currencies

The company's financial statements are presented in INR, which is also the company's functional currency.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Company at the functional currency spot rate at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange as at the reporting date. Exchange differences arising on settlement or translation of monetary items are recognised in statement of profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

4.3. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability
- Or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, as described below, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Significant accounting judgements, estimates and assumptions
- Quantitative disclosures of fair value measurement hierarchy
- Financial instruments (including those carried at amortised cost)

4.4. Property, plant and equipment

The Company has elected to continue with the carrying value for all of its property, plant and equipment as recognised in its previous GAAP financial statement as deemed cost at the transition date, i.e., 1 April 2015.

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of Property, plant and equipment are required to be replaced at intervals, the Company recognises such parts as individual assets with specific useful lives and depreciates them accordingly. All repair and maintenance costs are recognised in profit or loss as incurred.

Capital work-in-progress comprises cost of fixed assets that are not yet installed and ready for their intended use at the balance sheet date.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised.

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

Depreciation

Depreciation is calculated on written down value based on the estimated useful lives of the assets as prescribed under Part C of Schedule II to the Companies Act 2013 except in case of office equipment which is depreciated over useful life of 3-15 years. For the assets put to use during the financial period, the depreciation is charged on pro rata basis from the date of put to use.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if required.

4.5. Intangible Assets

The Company has elected to continue with the carrying value for all of its intangible assets as recognised in its previous GAAP financial as deemed cost at the transition date, i.e., 1 April 2015.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Cost include acquisition and other incidental cost related to acquiring the intangible asset.

Research costs are expensed as incurred. Intangible development costs are capitalised as and when technical and commercial feasibility of the asset is demonstrated, future economic benefits are probable. The costs which are capitalized include the salary and ESOP cost of employees who are directly working on development of the asset for its intended use.

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. The management estimates of useful life of internally generated intangibles and acquired intangibles are 5 years over which the asset is amortised.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

Intangible assets under development

Expenditure incurred on acquisition /construction of intangible assets which are not ready for their intended use at balance sheet date are disclosed under Intangible assets under development. During the period of development, the asset is tested for impairment annually.

4.6. Leases

Company as a lessee

The Company's lease asset classes primarily comprise of lease for building. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether

NSI Infinium Global Limited**(formerly known as NSI Infinium Global Private Limited)****Notes to the financial statement for the year ended March 31, 2020**

a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset. The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets as below:

i) Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the underlying assets (i.e. 30 and 60 years). If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease Liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset. The Company's lease liabilities are included in other current and non-current financial liabilities.

(iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term. "Lease liability" and "Right of Use" asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

4.7. Impairment of non-financial assets

Non-financial assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

(i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the CGU to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognized in the Statement of Profit and Loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the statement of profit and loss if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4.8. Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

4.9. Revenue Recognition

Sale of products

Revenue from sale of products is recognised when the risks and rewards of ownership are transferred to customers, which generally coincides with delivery to the customers. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

Rendering of services

Revenue is recognised upon transfer of control of promised services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those services.

Revenue from Web Services is recognised upfront at the point in time when the service is delivered to the customer. In cases where implementation and / or customisation services rendered significantly modifies or customises these services, these services are recognised proportionally over the period.

Revenue is measured based on the consideration specified in a contract with the customer and excludes amounts collected on behalf of customers. The Company presents revenue net of discounts and collection charges. Revenue also excludes taxes collected from customers.

Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled revenue (only act of invoicing is pending) when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

Excess billing over revenue ("contract liability") is recognised when there is billing in excess of revenues. In accordance with Ind AS 37, the Company recognises an onerous contract provision when the unavoidable costs of meeting the obligations under a contract exceed the economic benefits to be received.

Contracts are subject to modification to account for changes in contract specification and requirements. The Company reviews modification to contract in conjunction with the original contract, basis which the transaction

NSI Infinium Global Limited**(formerly known as NSI Infinium Global Private Limited)****Notes to the financial statement for the year ended March 31, 2020**

price could be allocated to a new performance obligation, or transaction price of an existing obligation could undergo a change. In the event transaction price is revised for existing obligation, a cumulative adjustment is accounted for.

The Company disaggregates revenue from contracts with customers by offering and geography.

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date as per contract.

Interest income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR). The EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the statement of profit or loss.

Export incentives

Export incentives are accounted on accrual basis based on service rendered.

4.10. Financial instruments – initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a) Financial assets**(i) Initial recognition and measurement.**

All financial assets, except investment in subsidiaries and joint ventures, are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial assets.

(ii) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments at fair value through profit or loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income (FVTOCI)

• Debt instruments at amortised cost :

A debt instrument is measured at amortised cost if both the following conditions are met:

- the asset is held within a business model whose objective is to hold assets for collecting contractual cash flows; and

NSI Infinium Global Limited**(formerly known as NSI Infinium Global Private Limited)****Notes to the financial statement for the year ended March 31, 2020**

- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

- **Debt instruments at fair value through other comprehensive income (FVTOCI)**

A debt instrument is measured at fair value through other comprehensive income if both of the following criteria are met:

- the objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- the asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, interest income, impairment losses & reversals and foreign exchange gain or loss are recognised in the statement of profit and loss. On de-recognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to statement of profit and loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

- **Debt instruments at fair value through profit or loss (FVTPL)**

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or fair value through other comprehensive income criteria, as at fair value through profit or loss. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the Statement of profit and loss.

- **Equity instruments:**

All equity investments in scope of Ind-AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

- **Investment in subsidiary:**
Investment in subsidiary is carried at cost in the standalone financial statements.

(iii) De-recognition of financial assets

A financial asset (where applicable a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

(iv) Impairment of financial assets

The Company recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised is recognized as an impairment gain or loss in profit or loss.

b) Financial Liabilities

(i) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings.

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

(ii) Subsequent measurement of financial liabilities

The measurement of financial liabilities depends on their classification, as described below:

• **Financial liabilities at fair value through profit or loss**

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind-AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risks are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit and loss. The Company has not designated any financial liability as at fair value through profit and loss.

• **Loans and Borrowings**

After initial recognition, interest-bearing borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

This category generally applies to borrowings.

(iii) De-recognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

c) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

4.11. Cash and cash equivalent

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

4.12. Taxes

Tax expense comprises of current income tax and deferred tax.

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Current income tax relating to items recognised outside Statement of profit and loss is recognised outside Statement of profit and loss (either in other comprehensive income or equity). Current tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax base of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside Statement of profit and loss is recognised outside Statement of profit and loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

The Company does not recognizes tax credits in the nature of MAT credit as an asset since there is no convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which tax credit is allowed to be carried forward. In the future year in which the Company recognizes tax credits as an asset, the said asset is created by way of tax credit to the Statement of profit and loss.

4.13. Retirement and other employee benefits

a) Short Term Employee Benefits

All employee benefits payable within twelve months of rendering the service are classified as short term employee benefits. The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the year.

b) Post-Employment Benefits

(i) Defined contribution plan

Employees provident fund scheme and Employees State Insurance Scheme (ESIS) is a defined contribution plan. The Company's contribution paid/payable under the scheme is recognised as expense in the statement of profit and loss during the period in which the employee renders the related service. The Company makes specified monthly contributions towards employee provident fund and ESIS.

(ii) Defined benefit plan

Gratuity benefit scheme is a defined benefit plan. The present value of the obligation under such defined benefit plans is determined based on the actuarial valuation using the Projected Unit Credit Method as at the date of the Balance sheet reduced by the fair value of any plan assets. The discount

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

rate used for determining the present value of the obligation under defined benefit plan, are based on the market yields on Government securities as at the balance sheet date.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the Balance Sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to Statement of Profit and Loss in subsequent periods.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the Statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

4.14. Inventories

Inventories comprise stock-in-trade, are valued at the lower of cost and net realisable value. Cost includes cost of purchase and other costs (net of refundable taxes and levies) incurred in bringing the inventories to their present location and condition. In determining the cost, specific identification method is used.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

The comparison of cost and net realisable value is made on an item-by-item basis.

4.15. Employee stock option schemes

The Employees Stock Option Scheme ('the Scheme') provides for grant of equity shares of Infibeam Avenues Limited (formerly known as Infibeam Incorporation Limited) (the erstwhile holding company) to employees of the Company. The scheme provides that employees are granted an option to subscribe to equity share of the erstwhile holding company that vest in a graded manner. The options may be exercised within specified period. The erstwhile holding company follows the fair value method to account for its stock based employee compensation plans. The expense recognised in the Statement of profit and loss for a period represents the cost charged by the erstwhile holding company net of cost recovered from fellow subsidiaries on proportionate basis.

4.16. Earnings per share

Basic EPS amounts are calculated by dividing the profit or loss for the year attributable to equity shareholders for the period by the weighted average number of equity shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit or loss attributable to equity shareholders for the period by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

4.17. Segment reporting

Based on management approach as defined in Indian Accounting Standard 108 – Operating Segment, Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker for evaluation of Company's performance.

4.18. Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of provision to be reimbursed, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingencies

Provision in respect of loss contingencies relating to claims, litigation, assessment, fines, penalties etc. are recognised when it is probable that a liability has been incurred, and the amount can be estimated reliably.

Contingent liabilities and contingent assets:

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognised nor disclosed in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognised in the period in which the change occurs.

4.19. Changes in accounting policies and disclosures

New and amended standards

The Company applied Ind AS 116 Leases for the first time. The nature and effect of the changes as a result of adoption of this new accounting standard is described below. Several other amendments apply for the first time for the year ending March 31, 2020, but do not have an impact on the standalone financial statements of the Company.

(i) Ind AS 116 Leases

Ind AS 116 supersedes Ind AS 17 Leases including its appendices (Appendix C of Ind AS 17 Determining whether an Arrangement contains a Lease, Appendix A of Ind AS 17 Operating Leases-Incentives and Appendix B of Ind AS 17 Evaluating the Substance of Transactions Involving the Legal Form of a Lease). The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to

NSI Infinium Global Limited

(formerly known as NSI Infinium Global Private Limited)

Notes to the financial statement for the year ended March 31, 2020

recognise most leases on the balance sheet. Lessor accounting under Ind AS 116 is substantially unchanged from Ind AS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in Ind AS 17. Therefore, Ind AS 116 does not have an impact for leases where the Company is the lessor. The Company adopted Ind AS 116 using the modified retrospective method of adoption, with the date of initial application being April 01, 2019. The Company elected to use the transition practical expedient to not reassess whether a contract is, or contains, a lease at April 01, 2019. Instead, the Company applied the standard only to contracts that were previously identified as leases applying Ind AS 17 and Appendix C of Ind AS 17 at the date of initial application. The Company also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option (short-term leases), and lease contracts for which the underlying asset is of low value (low-value assets). Upon adoption of Ind AS 116, the Company applied a single recognition and measurement approach for all leases for which it is the lessee, except for short-term leases and leases of low value assets. The Company recognised lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets. In accordance with the modified retrospective method of adoption, the Company recorded the lease liability at the present value of the remaining lease payments discounted at the incremental borrowing rate as on the date of transition and has measured right of use asset an amount equal to lease liability. Refer note 31 for detailed impact on adoption of Ind AS 116 "Leases" on the financial statements of the Company.

(ii) Appendix C to Ind AS 12 Uncertainty over Income Tax Treatment

The appendix addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of Ind AS 12 and does not apply to taxes or levies outside the scope of Ind AS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments. The Interpretation specifically addresses the following:

1. Whether an entity considers uncertain tax treatments separately
2. The assumptions an entity makes about the examination of tax treatments by taxation authorities
3. How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
4. How an entity considers changes in facts and circumstances

The Company determines whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments and uses the approach that better predicts the resolution of the uncertainty. In determining the approach that better predicts the resolution of the uncertainty, the Company has considered, for example, (a) how it prepares its income tax filings and supports tax treatments; or (b) how the entity expects the taxation authority to make its examination and resolve issues that might arise from that examination.

The Company determined, based on its tax compliance, that it is probable that its tax treatments will be accepted by the taxation authorities. The Appendix did not have an impact on the standalone financial statements of the Company.

(iii) Amendments to Ind AS 109: Prepayment Features with Negative Compensation

Under Ind AS 109, a debt instrument can be measured at amortised cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to Ind AS 109 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract. These amendments have no impact on the standalone financial statements of the Company.

NSI Infinium Global Limited
(formerly known as NSI Infinium Global Private Limited)
Notes to the financial statement for the year ended March 31, 2020

(iv) Amendments to Ind AS 19: Plan Amendment, Curtailment or Settlement

The amendments to Ind AS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- (a) Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event.
- (b) Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments had no impact on the standalone financial statements of the Company as it did not have any plan amendments, curtailments, or settlements during the period.

(v) Amendments to Ind AS 28: Long-term interests in associates and joint ventures

The amendments clarify that an entity applies Ind AS 109 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the expected credit loss model in Ind AS 109 applies to such long-term interests.

The amendments also clarified that, in applying Ind AS 109, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognised as adjustments to the net investment in the associate or joint venture that arise from applying Ind AS 28 Investments in Associates and Joint Ventures.

These amendments had no impact on the standalone financial statements as the Company is in compliance with the said amendment.

4.20. Annual Improvements to Ind AS 2018

(i) Ind AS 103 Business Combinations

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation. An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 April 2019.

These amendments had no impact on the standalone financial statements of the Company as there is no transaction where joint control is obtained.

(ii) Ind AS 111 Joint Arrangements

An entity that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in Ind AS 103. The amendments clarify that the previously held interests in that joint operation are not remeasured. An entity applies

NSI Infinium Global Limited

(formerly known as NSI Infinium Global Private Limited)

Notes to the financial statement for the year ended March 31, 2020

those amendments to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after April 1, 2019.

These amendments had no impact on the standalone financial statements of the company as there is no transaction where a joint control is obtained.

(iii) Ind AS 12 Income Taxes

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognises the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where it originally recognised those past transactions or events.

An entity applies the amendments for annual reporting periods beginning on or after 1 April 2019. Since the Company's current practice is in line with these amendments, they had no impact on the standalone financial statements of the Company.

(iv) Ind AS 23 Borrowing Costs

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete. The entity applies the amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after 1 April 2019. Since the Company's current practice is in line with these amendments, they had no impact on the standalone financial statements of the Company.

The Company offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

In assessing the realizability of deferred income tax assets, management considers whether some portion or all of the deferred income tax assets will not be realized. The ultimate realization of deferred income tax assets is dependent upon the generation of future taxable income during the periods in which the temporary differences become deductible. Management considers the scheduled reversals of deferred income tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred income tax assets are deductible, management believes that the Company will realize the benefits of those deductible differences. The amount of the deferred income tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry forward period are reduced.

EXTERNAL RISK FACTORS

1. Regulators, Economic, Social and Political Uncertainties:

Suvidhaa is incorporated in India. It's Equity shares are to be listed on the BSE and/or the NSE subject to the receipt of the final listing and trading approvals from the respective stock exchanges. Consequently, our business, operations, financial performance and the market price of company's equity shares will be affected by the interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Important factors that could cause actual results to differ materially from our company's expectations include, but are not limited to the following:

- i. Adverse economic conditions or reduced information technology spending;
- ii. New Government initiatives to cover the unbanked peoples of country;
- iii. RBI's Initiatives to strengthen the Rural banking

2. Any Adverse revision to India's debt rating by a domestic or international rating agency could adversely affect company's business:

India's sovereign debt rating could be adversely affected due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

3. The occurrences of natural or man-made disasters could adversely affect company's results of operations, cash flows and financial conditions, Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and company's business:

Our operations may be damaged or disrupted as a result of natural disasters such as earthquakes, floods, heavy rainfall, tsunamis and cyclones and other events such as protests, riots, wars, pandemic and labour unrest. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations which may affect our business. Damage or destruction that interrupts our operations could adversely affect our reputation, our relationships with our customers, our senior management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our infrastructure. While our insurance policies for assets cover such natural disasters, such policies may not be adequate to cover the loss arising from

these events, which could adversely affect our results of operations and financial condition and the price of our Equity Shares.

Additionally, India has from time to time experienced instances of civil unrest and terrorist attacks, regional or international hostilities or other acts of violence of war as well as other adverse social, economic and political events. These events could lead to political or economic instability in India and may adversely affect the Indian economy, as well as our Company. If such tensions occur in places where we operate or in other parts of the country, leading to overall political and economic instability, it could adversely affect our business, results of operations, financial condition and the trading price of our Equity Shares.

4. The market value of the Equity Shares may fluctuate due to the volatility of Indian Securities markets:

Indian securities markets may be more volatile than and not comparable to, the securities markets in certain countries with more developed economies and capital markets than India. Indian stock exchanges have, in the past, experienced substantial fluctuations in the prices of listed securities. Indian stock exchanges (including the BSE and the NSE) have experienced problems which, if such or similar problems were to continue or recur, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares. These problems have included temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of Indian stock exchanges have, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, from time to time, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have a negative effect on market sentiment.

5. Impact of Global Pandemic COVID-19:

The Corona Virus Diseases (COVID -19) which had been initially recognized in Yuhu of China and affected adversely to the economic situation of China due to lockdown in concerned locations. Slowly the virus spread globally and on March 11, 2020 World Health Organisation (“WHO”) had declared it as Global Pandemic Situation.

The Indian Government has taken pro-initiative and imposed complete Nation Lockdown on March 24, 2020 to control the spread of virus and after that series of lockdown has been imposed. During this lockdown all kinds of transport, offices has been closed down and the companies were unable to operate their businesses in normal course of operations as the employees were not able to reach offices/business locations. Suvidhaa is impacted very badly due to this lockdown phase/disruption as its entire business and operations are through small mom & pop kirana stores/Retail outlets which were completely shut all over the country.

Developing countries like India had faced a draconian slowdown in Economy, Securities markets were at their lowest and Indian stock exchanges (BSE/NSE) were decreased by 30%-35% during lockdown phase and Equity price of many companies has been decreased by 50%-60%. So, this kind of situation can adversely impact the price of Suvidhaa's equity shares too in future, if such situation arises.

Worldwide the process for creation of Vaccine has started on high priority to control the spread of COVID -19 but yet none of the country has succeeded in the same and till the time a proper vaccine or medicine is invented the economic growth of any country/company will be in dilemma due to this pandemic situation.
